EXPERIENCE

Marketing Web Developer   February 2024 - Present
EssilorLuxottica Vision Direct, London, UK
- Contributed to the website migration project across 8 domains for the EU and UK, improving UX and content structure.
- Developed, updated, and optimized web pages across multiple markets (UK, Ireland, Netherlands, Belgium, France, Spain, Germany) using CoreMedia CMS, including banners, CTAs, navigation elements, and product listings.
- Ensured seamless content migration by maintaining copy accuracy, design consistency, and functional requirements.
- Conducted UAT testing to ensure content accuracy, proper functionality, and design consistency.
- Identified, reported, and resolved bugs via JIRA and ClickUp, collaborating with developers and designers to enhance performance.

Recognition of Excellence at Work
- Consistently met tight project deadlines while maintaining high-quality standards across multiple domains, earning appreciation from leadership and colleagues for dedication and efficiency.
- Received a performance-based bonus in recognition of impactful contributions to the website migration project.

Student Learning Assistant   October 2021 - Apr 2022
Middlesex University Dubai, UAE
- Supported in debugging code for second-year students as a teaching assistant for website design and wireframing.
- Demonstrated strong leadership skills by effectively coordinating cross-functional teams.

PROJECTS- https://misbah1209.github.io/

Fashion Travel Planner - HTML | CSS | JavaScript | Django | SQLite3   **June 2023**
- Developed a dynamic web app enabling users to access outfit recommendations based on real-time weather data from an external API, earning a top grade A4 for the project.
- Implemented a travel checklist feature, aiding users in preparing for their trips to increase in user productivity.
- Integrated an admin panel for efficient database management for reducing database maintenance time.

Furniture Retail Webapp - HTML | CSS | JavaScript | Django   **January 2023**
- Created a comprehensive e-commerce website, leading to a score an A grade for the project.
- Utilized Python, JSON, jQuery, and SQLite3 to streamline database operations.
- Employed Python and Django to create a robust and scalable core structure for the application.

Afterschool Activities Website - HTML | CSS | JavaScript | Vue.js | MongoDB   **January 2021**
- Developed an Ecommerce website, that implemented product recommendation system based on user search history.
- Enabled customers to edit personal details and view previous orders, leading to reduce customer support inquiries.
- Led a collaborative team effort to successfully implement the website, achieving a top score of 98/100.
